1 Resume.....	2
2 JFOR.....	2

1. Resume

My [resume](#) is written in XML source and converted to XSL-FP and PDF using XSLT and FOP engines from the [Apache XML Project](#). XHTML, WML and RTF (using [JFOR](#)) output is also supported. Feel free to examine and use the [Document Type Definition](#) and style sheets. Other resume schemas are available at the [XML Resume Library](#) and the [HR-XML Consortium](#).

- [resume DTD](#)
- [XSL-FO stylesheet](#)
- [HTML stylesheet](#)
- [WML stylesheet](#)

2. JFOR

[JFOR](#) converts [XSL-FO](#) documents to [RTF](#), much in the same way that [Apache FOP](#) converts XSL-FO documents to text and PDF. (In fact, JFOR is currently being integrated into Apache FOP)

As a [Sourceforge developer](#), I contributed some improvements over the course of about six

months so I could convert my [XML resume](#) and various [DocBook articles](#) to RTF, since many recruiters and publishers want Word documents (I have since concluded that PDF should be good enough for anyone - they can cut-and-paste, if they really want to use Word or text). The changes include:

- Support for *proportional-column-width* for the table-column *width* attribute.
- Support for *em* units.
- Support for *pc* units.
- Some support for expressions, e.g. "4in - -4pc".
- Support for generic font families, e.g. "sans-serif".
- Support for font family lists, e.g. "helvetica,sans-serif".
- Fixed incompatibility with Cocoon 2.

The changes are checked into the [Sourceforge repository](#), but the build there has not been updated recently, so you can use my unofficial [jar file](#). The corresponding [javadoc](#) is available, too.

Note that the minimum Java version required is [Java 2 version 1.3](#).
